The Alumni Must Meet The Emergency!

Pittsburgh Plan

For two years now Phi Rho Sigma has been taking the lead in the Medical Interfraternity Conference in urging that the Conference approve and sponsor the regulatory procedures of rushing as they have been worked out by the Medical Interfraternity Council at the University of Pittsburgh. The Pittsburgh Council has stopped the suicidal competition between fraternities in rushing. It has limited the number of rushing events per fraternity. The chapter files a list of the men it would like to become members of this chapter, and the freshmen file with the central agency the list of chapters in the order of his preference. The Council compared rushee choices with fraternity preference and announced the roster of new pledges to each organization. Once a man has indicated his choice he cannot "depledge" himself. Each chapter has a quota which is not to be exceeded.

The details of this plan have been sent in a booklet to each of the chapters a second time and should be kept in the archives of the chapter. All members should familiarize themselves with the plan. The situation in medical schools is different from that of any other school in the university in that there are enough chapters to offer an invitation to belong to a medical fraternity to every student. Unless some such regulation as this is installed to pass on rushing, it becomes so competitive that it interferes with the work of the students. Where the Interfraternity Council is formed and functions, every man gets about what he wants and every chapter gets about the men they want, but no one is left stranded entirely.

A. M. A. Luncheon at Atlantic City

For years Phi Rho Sigma has always had a successful luncheon in connection with the annual meeting of the American Medical Association.

Our Editor Goes to War

The bright spot in each of the many meetings throughout the years has been the informal and kindly spirit of "Spicy" Morgan who served our Fraternity and the House of Delegates of the American Medical Association for years. We shall meet again this year, and Jack Wilson, *Rho,* the well-known dermatologist of Philadelphia has arranged for another bang-up reunion at the Ambassador Hotel, on Wednesday, June 10, during the meeting of the American Medical Association. Every Phi Rho should make it a point to register at the Fraternity desk when he registers for the whole meeting and join us at the luncheon.

$3500 Have Been Raised So Far

Realizing that the members of the fraternity who are enrolled in those schools which have adopted the plan of telescoping their curriculum as a war measure are faced with the fact that they will have no chance to earn additional money this summer. In the meantime one who drops out of medical school for any purpose, even to earn money, finds himself at once in the Armed Forces because he has been allowed to stay out only for the purpose of completing his medical education. Faced with a long war, as we seem to be, this means that our own Phi Rho brothers in many instances will never have a chance to complete their medical educations unless we come to their rescue. What could be more fraternal than this and where is there a better cause?

Realizing these things, President Forman sent out a letter to all alumni and actives asking them to contribute as they are able. The Board of Trustees of the Student Loan Fund had assumed that this emergency would require an addition of $20,000 to the Student Loan Fund of the Fraternity. President Forman in his letter said that if one in ten would contribute $10.00 or more, we would be able to meet this emergency. Unfortunately up to the present time only about one in forty-five have contributed and none of these have been large sums. If therefore you have not contributed, you are earnestly urged to do so. If you have contributed and can possibly afford to make another contribution, this, too, will be most helpful.

War, Nutrition, and The Medical Student

JONATHAN FORMAN, M.D.,

It has taken a war to make us conscious of our nutrition. It has always seemed strange to me that even medical men have not done much about getting a good nutrition for themselves. Good nutrition rests upon a tripod of good, carefully prepared food, good digestion and assimilation, and adequate physical exercise to mantain bodily tone. The neglect of these explains the disgraceful death rate among physicians at the height of their productive years. It is even more important now with medical students that they shall be able to take "these telescope courses" without "cracking" under the strain. This test will require the best of nutritional status.

In the first place vitamins are not foods! They do not give our bodies fuel. They are substances which aid our bodies to use the foods we eat. Nature has put a little (but a sufficient amount) with each mouthful of food. It is therefore unnatural to take our vitamins in concentrated forms. Vitamin concentrates are necessary for physicians to use on people who are sick. People with certain diseases which prevent their absorbing and using their food, and people who must be on restricted diets need these supplements. Well people should get their vitamins in their natural state along with the food stuffs at the grocery stores and vegetable markets.

All of this talk about sound diet is really a very simple thing. Every medical student should therefore understand it and see to it that he has a good menu and consequently a good state of nutrition for himself.

Everyone needs one good helping of meat each day, no more! Sugar, starches and fats enough to furnish the necessary calories. But these sugar, starches and fats should come in natural food stuffs and not in the overly refined state that is usually offered. If the rationing authorities in Washington will keep our sugar away from us during the War, we will be a much more healthy nation. There is no reason why a medical student should use any sugar in his diet at all. The reason we have a vitamin shortage in our diets is because more than half of our foods are overly refined sugars and starches, and we try to load the other half with vitamins, and nature just does not allow us to get them in these concentration forms. Hence the deficiencies.

Fat students should realize that they are fat because they over-eat, and that they over-eat because their bodies are calling for vital substances—minerals and vitamins—which are lacking in their refined starches and granulated sugar diet. Just as a sheep deprived of lime in his winter feeding will eat the boards off his pen and the wool off his pen-fellow's back, these fat fellows are eating everything in sight in the vain hope that they will get the necessary vitamins which are not there. If the diet has an adequate amount of these essential food stuffs, the calories automatically balance and the waist line is reduced to the normal. Students who are underweight are in a particularly dangerous position in a medical school. The number of these who contract tuberculosis during their student and interne days is another disgrace to American medicine. If these boys will all see to it that they have an adequate amount of proteins of good quality (one good helping of meat each day, making frequent uses of the glandular organs) and will get an adequate amount of the vitamins found in green and yellow food stuffs, as well as the ones in fruit juices, this whole disgraceful tuberculosis rate among us can be decidedly cut down.

In all green and yellow food stuffs there is a vital oil-soluble substance which protects the epithelial cells in the mucous membranes of the body, and the various ducts in the skin, from undergoing a metaplasia and coming to have the structure of the rickety flagstone side-walk of the old home village. This change in structure allows the bacteria to get into the skin, and acne to develop, boils to arise, and infections of the nose and throat to occur. We cannot say that if you take cod liver oil, you will not have a cold because there are many other factors in infection, but we can say that if you take enough of this oil vitamin, you will not offer these cracks in your armor to infected bacterias so that in any large group of people, such as the chapter, if adequate supplies of these vellow and green substances are given, there will be many less infections of the skin and the nose and throat. These metaplastic changes plug up the tear ducts of the eye and cause the whole socket and eye to become inflamed, and eventually to cause the cornea to ulcerate and fall out. The Danes thus sold the eyesight of their school children, with their butter and cheese, to the Germans in the last World War. The changes brought about by lack of this food substance will also interfere with the flow of bile and the function of the gall-bladder, causing definite food dyspepsia with a good deal of distress and inefficiency, especially if the Chapter House cook tries to fill up the stomachs of young men with gravies. One of the early changes noticeable from a lack of this yellow essential is a scaliness of the skin and the development of a grater-like appearance of the skin of the elbows, thighs, and the back of the neck and over the shoulders.

What is more important to medical students is the "night blindness" that the absence of this vitamin produces. This "night blindness" is an inability to see in a dim light due to a slow regeneration of the visual purple. Every one engaged in study should therefore see to it that his eyes do not have this added burden of a lack of Vitamin A. Remember, too, that an oil soluble vitamin, such as the one we are discussing, is rapidly absorbed in mineral oil so that if you have the laxative habit, you will lose all—or practically all—of this vitamin. If you are getting proper foods, there is no place in your life for a laxative. Constipation requiring bulk laxatives are an expression of the lack of the vitamin which comes in the germinating portions of the berries of grain. Medical students should never have it.

This second vitamin which is found in whole grain preparation, and in the meat of animals who have been grain fed, is of the highest importance to your morale and nervous system, as well as to the development of a fraternal feeling within the Chapter. All breads that you eat should be of the whole berry type (whole wheat, 100% rye, pumpernickel, brown rice), and no bread should be served by the Chapter Steward which has not been enriched by the Vitamin B-1. This will give you a good appetite, regular bowel movements, and a feeling of buoyant health, and a very great increase in your capacity to do work, both mental and physical.

Again, fruit juices, especially tomato and citrus, play an important part in the health of each of us. If you have studied bacteriology already, you know the growing importance of the presence of complement in your blood serum as an aid against infections. The vital essential in fruit juices is deeply concerned in the production of this antibody. The lack of this substance produces scurvy, minor deficiencies, receding and bleeding gums, which easily become infected by whatever organism that happens along. This infected condition is known as pyorrhea.

Therefore it is important that you get a good helping of fruit juices every day and if you are getting tomatoes instead of citrus fruits, you should have four times as much. It is also of the greatest importance that these juices be freshly extracted, or taken from a can that has been kept from the air. Vitamin C is easily oxidized and destroyed. Great economies can be effected in the Chapter House if this material is bought, as is grapefruit juice, in large containers. There are many other vitamins but they do not need to concern us in arranging our own diets because they come packaged along with the things I have described. The green leaf of the plant, for instance, contains another oil soluble, one of considerable importance. There is another one occurring in the berries of grain, but if we get the ones we have discussed in detail, we will have the others.

There is no one vitamin that most of us need to get from the drug store. Nature has provided you with a factory for making your own, but your way of living prevents your factory from operating. When the sun shines upon your skin, the action of certain of the rays upon the body long enough, gives you the proper quantity of Vitamin D. If you get a proper amount of sunshine for a long enough time in the summer, you can store up enough of this substance which is necessary for maintaining the integrity of your bones and teeth especially. Living indoors as we do, and dressing as we do, we even do not get enough of this and so we have to resort to cod liver oil during winter months. Additional supply of this can easily be obtained, very cheaply, if the Steward will buy milks which have been irradiated, or to which Vitamin D has been added. This will give you about 400 units and should be taken into consideration in planning any dose of additional liver oil which you take yourself.

There are many important minerals. The next few years will bring about important discoveries in minerals which appear in our food stuffs. We have already learned how important these things are to plant life and no doubt we shall learn much about them in the next few years in relation to human health. So far as your menu now is concerned, you will have to trust to getting enough of this by seeing that you have a wide variety of food stuffs, raised on many different soils in as many different parts of the country as is possible. In this connection, it is wise to remember that vegetables raised by the professional truck gardener are much more likely to be rich in these things than are those which come from the run-of-the-mill farmers. The modern truck gardener is pretty well informed and is now advised by experts on the proper fertilizers for his gardens. He has also become informed in the diagnosis of "hidden hunger" in plants through mineral deficiencies.

Therefore if you see to it that you get an adequate supply of green and yellow food stuffs, but the greener they are and the yellower they are the better, and if you will see to it that you get all of your starches and sugars from whole grain berries and from fruits, and if you will get one good helping of lean meat every day, if at least once or twice a week this is liver, kidney or heart, if once a week you serve. Trace minerals by getting some foods from the depths of the ocean, and if you will get a good helping of some fresh or properly prepared fruit, then good health and efficiency will be yours.

In order to make this thing simpler, I refer you to table showing the necessary properties per week, per boarder at the Chapter House table.

MARKETING LISTS FOR ONE WEEK

	Milk (1)	Potatoes, Sweet Potatoes	Dried Beans, Peas and Nuts	Vitamin C Rich Foods	Leafy, Green, Yellow Vegetables	Other Vegetables and Fruits	Eggs
Low Cost	6 qts.	7 lbs.	12 oz.	2 lbs.	2 lbs. 8 oz.	2 lbs. 8 oz.	3
Liberal	6 qts.	4 lbs.	5 oz.	5 lbs.	4 lbs.	9 lbs.	7

Lean Meat, Poultry, Fish	Flour, Cereals (2)	Fats (3)	Sugar (4)
2 lbs. 8 oz.	3 lbs. 8 oz.	13 oz.	1 lb.
4 lbs. 12 oz.	4 lbs. 8 oz.	1 lb. 14 oz.	1 lb.

NOTES ON MARKETING LIST

1. 1 qt. milk daily or its equivalent, 5 oz. American (Cheddar) cheese, or one qt. skimmed milk and 1½ oz. of butter, or 4½ dried whole milk or 3½ oz. dried skim milk and 1½ oz. of butter, or 12 oz. of evaporated milk.
2. Count 1½ lbs. of bread as 1 lb. of flour. Use only whole grain or enriched flour and its products.
3. In calculating fats, indicate butter, bacon, fat pork, cooking and salad oils.
4. Sugars count in white, confectioners, brown, or maple sugars, syrup, molasses, jellies, preserves, candies.

(Above adopted from U. S. Consumer's Guide, October 15, 1941.)

From Student Loan Contributors

"A loan is better than a straight scholarship. People who really work to repay a loan get more satisfaction out of their education and undoubtedly turn out better in every way." *D. O. A.*

"I remember the help that the Fund afforded me when I was in school. I only wish it were possible to give more liberally." *Alpha Theta.*

"The idea is fine and for fear that somebody will not come across, I am doubling the amount." *Zeta.*

"I may be able to send another contribution in a month if the necessity is great. To me this is the most practical thing we have been able to do for both the boys and the country, and I am glad to sidetrack this from a defense bond." *Zeta.*

"It is a worthy cause and is deserving of support, and I would like to wish you great success in this venture." *Kappa.*

Vann Has Been Sick

All Phi Rhos will be glad to know that Herbert M. Vann, *Rho,* professor of anatomy in the Bowman Gray School of Medicine at Winston-Salem, N. C., has recovered from his recent illness. Brother Vann has served for a good many years as Councilor of our Wake Forest Chapter.

THE JOURNAL
of Phi Rho Sigma

is the official publication of the Fraternity and is published five times a year. It is sent to every living member. Subscription $2.00 per year.

Address all communications concerning the JOURNAL to the Editor, and correspondence concerning the Fraternity in all other matters to Dr. Ralph W. Elliott, Secretary-Treasurer, 10515 Carnegie Avenue, Cleveland, Ohio.

EDITOR

PAUL L. McLAIN, M.D., 33 McKelvey Road, Pittsburgh, (18) Pa.

ASSOCIATE EDITORS

JOHN W. KARR, M.D., Clifton Springs Sanitarium, Clifton Springs, N. Y.

HARRY F. MERSHON, M.D., 1407 S. Hope Street, Los Angeles, Calif.

Vol. 38 May, 1942 No. 4

Paul McLain, the Editor, has reported for active duty with the Armed Forces of the United States. Except for the editorial on this place, this issue of THE JOURNAL has been gotten out by the central office and Dr. Elliott, with the aid of Brothers Dudley Stewart and Jonathan Forman.

War Tests The Fraternity

Since that time, in retrospect so remote, when the clouds of war first began to gather over the western hemisphere, fraternity leaders have been trying to devise means for cushioning the inevitable shock of conflict upon the fraternity system. In many ways, the attempt has of necessity been based upon conjecture: that the blow would come from certain directions was fairly certain, but its force and extent and exact form could not be determined with any degree of accuracy. Now that war is a fact instead of a strong probability, now that the first pressure of its impact upon fraternity life has been felt, some of the issues invalued are crystallizing. Present trends indicate that, as a condition of ultimate victory, the emergency will test as with fire or acid the fundamental structure of individual fraternities rather than the basic ideology of fraternalism.

First of all, war will test the undergraduate phase of fraternity life. Despite the emphasis which has been placed on education and technical training in the total defense program, despite the policy of acceleration in the completion of curricula at all university levels, despite the far sighted administration of selective service, it is reasonable to expect a decline in college population, and perhaps a disproportionate decline in available fraternity material. Fraternity membership is generally regarded as a sort of luxury, desirable but not indispensable. Public opinion in time of war frowns upon luxuries. The policy of continuance operation throughout the year, now adopted increasingly by colleges and universities, will place additional financial burdens upon students, not to mention additional academic burdens. Though valid arguments can and will be marshalled in defense of fraternity membership in such times as these, the trend of kamor interests will naturally lie in other directions. Fraternities must therefore expect a diminution in membership and must adjust themselves accordingly, before the situation becomes acute.

Although financial problems due to depletion of undergraduate chapter rolls loom largest, they are not the only difficulties which will plague the fraternities. Leaders would be wise to anticipate perceptible changes in the quality of available personnel. Key men in chapters may be summarily removed, and with them may be taken the mechanism for the training of suitable replacements. More than ever before will it be necessary to examine the objectives and policies of the organization, and to bring these into line, first with the financial potentialities of the order, second with the capabilities of the members, and lastly with the psychological tide of the day —and this without sacrifice of those concepts and tenets to which the organization owes its identity. There will be a slowing up and perhaps a shift of emphasis, but there must not be a relaxation in standards or a deviation from avowed purpose. These adjustments call for cool heads and strong hands as the helm from the national office to the lowliest chapter committee.

Secondly, war will test—war will strain to the utmost the graduate or alumni organization. In fact, it is easy to conceive of complete dissolution of this very important phase of fraternity business. Partly, such catastrophic potentialities will arise from diversion of interest to fields of more immediate importance. Men who remain at home will be increasingly occupied with their own affairs. Alumni in the armed services will present the additional problems of geographic dispersion and of frequent change of station. Fraternity leaders must plan and execute devices whereby the fraternal contacts can be maintained or, at the very least, reestablished when the war is over. They must develop the means whereby the fraternity is brought clearly and repeatedly into the consciousness of men engaged, actually or potentially, in a very grave undertaking—men torn from the work they love and the people they love to fight for their country and all that it means to them.

It is the purpose of this discussion to focus attention on the problem rather than to suggesting solutions. If the problem is understood by the right people, solutions will be forthcoming. It is understood, no doubt, by the national officers of every fraternity. The writer contends that it must be equally clear to every chapter officer, whether he be an undergraduate or an alumnus. Obviously, the fraternities which have the most efficient and sound peace-time economy will find the adjustments required by war least difficult.

—o—

Do You Get the Journal?

Men who have joined up for the duration present a problem for THE JOURNAL. The Fraternity is anxious to maintain the contact but it simply does not have the help or the funds to make the necessary changes in addresses. The member's office has been kept and THE JOURNAL goes to his office. We suggest that his secretary enclose the copy with other mail matter, as she will undoubtedly know his whereabouts. If the member who is closing his office will notify Brother Elliott of the address of his next of kin, THE JOURNAL can be sent to this person and forwarded to him along with his other mail.

—o—

Bigelow Takes Kemp's Place

Hardy Kemp, *Chi Eta,* the new dean at Ohio State University Medical School, has been called to Army service because of his knowledge of and contribution to Tropical Medicine. Leslie L. Bigelow, *Omega,* has been appointed dean until Brother Kemp returns.

Phi Rhos in Military Service

The Surgeon Generals have requested the omission of locations and addresses of men in military service. Chapter secretaries and alumni are urged to send the names of men in service for our records. This list will be published in a subsequent issue of THE JOURNAL.

—o—

Associate Councilors Appointed

The Executive Council is pleased to announce the appointment of W. Whatley Battey, *Chi Alpha,* as an Associate Councilor for Georgia with special jurisdiction over fraternity activities at Augusta.

Fred Alexander, *Kappa,* has been appointed to serve as an Associate Councilor during the absence of G. Willard Brugler, Councilor for Ohio.

William H. Bradford, *Alpha Omicron,* has been appointed as Associate Councilor for Texas, with special jurisdiction over alumni and undergraduate activities in Dallas.

Carl S. Lingamfelter, *Upsilon,* has been appointed to act as Councilor for Virginia during the absence of Brother W. Ross Southward who is now serving in the Armed Forces of the United States.

Herbert M. Vann, *Rho,* will supervise the activities of Chi Theta Chapter pending the appointment of a Councilor for this district.

—o—

Fourth General Hospital —Lakeside Unit

Once again the famed Lakeside unit is serving overseas and with it are many Phi Rhos. Known as the Fourth General Hospital, U. S. Army, it has retained the number of its predecessor of 1917-1918, which, as Base Hospital No. 4, U. S. Army served for two years at Rouen, France. The following Phi Rhos are members of the unit: MEDICAL SERVICE: Majors Boyd G. King, Ralph L. Cox; SURGICAL SERVICE: Major Donald Glover, Captains Sidney E. Blandford, Vladmir L. Tichey, First Lieutenant Cleon C. Couch; ADMINISTRATIVE SERVICE: Major Guy W. Brugler.

Canadian Contributions!

Your attention is called to the fact that all contributions to the Emergency Student Loan Fund are deposited by Harris Gray of Toronto in the Bank of Montreal and will be used in Canada to relieve emergencies in the lives of the undergraduates in the Canadian chapters. For your information, all funds derived from Canadian sources are expended in Canada. Any contributions which you want to make to the Emergency Fund should be mailed directly to Dr. Harris M. Gray, 310 Runnymede Road, Toronto, Ont.

Phi Rho Sigma

Luncheon

A. M. A. Meeting

June 10

Ambassador Hotel

Please register at the Fraternity desk when you register for the A. M. A.

Beta-Gamma Merger

C. Grafton Weller, M.D., *Gamma,* of the committee appointed by President Forman to solve the problem of the proposed merger of Beta and Gamma Chapters since Rush Medical College is now a part of the University of Illinois, reports that of 177 replies sent to alumni only one vote was against the merger.

—o—

Memorial to Burns

Lt. Col. Gerald R. Burns, *Alpha Eta,* recently deceased held an important place in the practice and teaching of medicine in Halifax since 1929. The Burns Annex at Cogswell Military Hospital, which was built through his persistent effort, has been named in his honor.

—o—

The New Song Book

The committee announces that the new song book will be published soon. Further details will appear in a subsequent issue of THE JOURNAL.

Six Phi Rho Brothers

Owen Slaughter, the last of six brothers, was initiated by Iota chapter, April 18, 1942. He is a sophomore and had pre-medical work at Creighton University.

Six brothers members of Phi Rho Sigma. Six brothers initiated by Iota chapter. This unique record has never been approached in Phi Rho and probably not duplicated in any medical fraternity. The brothers came from Norfork, Nebraska. All had enviable scholastic records in school and have done outstanding work in medicine since graduation.

Wayne Slaughter, the oldest of the brothers, was initiated in 1930; A. M. in neurology, Nebraska, 1932; M. D., 1933; interne University of Nebraska hospital; D.D.S. University of Pennsylvania, 1937; Resident in plastic surgery Kings County Hospital, Brooklyn, two years; practicing oral surgery in Chicago and on the staff of Northwestern University.

Earl Slaughter, *Iota* 1933; M.D., 1936; interne University of Nebraska Hospital; resident in E. N. T. for three years, Massachusetts E. N. T. hospital, Boston; First Lt. U. S. A. M. C.; Carlisle Barracks, Pa.

Guy Slaughter, *Iota* 1934; M.D. 1937; resident for three years in Obstetrics and Gynecology, University Hospitals, Cleveland; Maternal and Child Health work, Little Rock, Arkansas.

Howard Slaughter, *Iota* 1937; M.D., 1940; now resident in dermatology at University Hospital, Ann Arbor.

John Slaughter, *Iota* 1937; M.D., 1940; interne University of Nebraska hospital; resident in ophthalmology at Barnes Hospital, St. Louis.

—o—

New Orleans Alumni

At the installation meeting of the Orleans Parish Medical Society, held January 12, 1942, the following Phi Rhos were inducted as officers: Edmund L. Leckert, First Vice President; Daniel J. Murphy, Third Vice President; Edwin L. Zander, Secretary; Max M. Green, Librarian. Gilbert C. Anderson presented the past president's certificate.

Chapter and Alumni News

UNIVERSITY OF TEXAS

Alpha Nu Chapter held its annual spring dance on February 14, the motif was along the line of St. Valentine's Day, to offer a brighter aspect for the present-day situation.

In preparation for any possible air raids on Galveston, the Chapter House has been designated as one of the first-aid stations in its district. All members of the fraternity have been asked by city defense officials to stand by for any emergency. In practice blackout on the night of January 8, the system of operation ran very smoothly; and although there were no actual injuries to be treated at the time, everyone feels confident that it will prove its efficiency in case of a real test.

John Gleckler is transferring to the University of Pennsylvania Medical School and Wishard Lorimer to Northwestern Universty Medical School. Both men will be greatly missed by Alpha Nu but our loss will be others gain, as they are of exceptional merit. Lynn Bernard and Jacob Roden have dropped out of school on account of tuberculosis. John Ellis and James Lay were married at Easter time.

You will be interested in the measures we are taking to become a truly professional fraternity, as Phi Rho should be. As we are the youngest chapter, we know practically nothing of other chapters. To remedy this situation we are crcularizing other chapters requesting pictures and items of interest of other groups to form a Phi Rho scrap book. Also we are publishing the ALPHA NU NEWS which is now in press. Jap Arnold in Houston is Editor.

The Phi Rho Sigma Memorial Lectureship will present another lecture this spring. As yet the speaker has not been chosen, but Brothers George Herrmann and Charles Stone are cooperating on this matter. Drs. Cecil and Dyer are high marks to shoot at.

Recently we have had at least two faculty members over for each Sunday lunch and shall continue this practice. The Fireside chats have been very popular as well as instructive to all members. These are very informal and questions flow freely.

At the suggestion of Brother Alber O. Singleton, and under his sponsorship, we have inaugurated the Phi Rho Sigma Journal Club. The first meeting will be this month and the papers will be discussed by faculty members not Phi Rhos.

Each Wednesday evening married members of the club are dinner guests and as a result they have shown increased interest.

Rushing for the coming year is going at a rapid pace. April 10 we had a party in Austin and a number of faculty members, including Brother Jack Ewalt, *Psi,* and Brother William Potter, *Iota,* attended.

Of course social activity is of great interest here and our social committee has great plans for the present quarter.

MEDICAL COLLEGE OF THE STATE OF SOUTH CAROLINA

Chi Delta announces the pledging of the following new members: John A. Workman, Woodruff, S. C.; Henry E. Boyter, Woodruff, S. C.; Charles B. Skinner, Hartville, S. C.; Stanton L. Collins, Batesburg, S. C.; Ben D. Thomas, York, S. C.; Leroy Brockman, Greer, S. C.; Walter E. Brooks, Charleston, S. C.; Fletcher B. Matthews, Columbia, S. C.; James W. Pitts, Columbia, S. C.; Walter R. McLawhorn, Greenville, S. C.

After the Pledging Ceremonies were over refreshments were served. The following Friday night a party was given in honor of the new pledges.

This year saw the opening of a dining room in the Chapter House and it has proved a valuable asset. On Friday night, December 12, The Medical College of the State of South Carolina, gave its Christmas Dance. Chi Delta entertained that night with a pre-dance party.

UNIVERSITY OF SOUTHERN CALIFORNIA

Although Delta Chapter has accumulated throughout the years, both during the time it has been active and inactive, a good-sized house fund, it has not been feasible up to now to be installed in a Chapter House. This year for the first time a House has been provided giving lodging and food to a limited number of upper classmen, as a step toward the obtaining of a permanent Chapter House. Meetings are held at the House bi-monthly and an attempt is made to have a guest speaker.

This year due to the untimely death of Dr. McKibben, the Founders Day Banquet and Initiation were postponed to March 14.

The Chapter is now awarding a key to each Senior who graduates in good standing. (This strikes the President of the Fraternity as a very happy attempt to solve a future problem.)

UNIVERSITY OF PITTSBURGH

Fifteen new men have been initiated this year. The Pittsburgh Alumni Chapter played host at the Initiation Banquet held Thursday evening, April 16 at "The Pines". Drs. Moke, Morris, Hill and Cooper, of the class of 1896, were the guests of honor. Ralph W. Elliott, Secretary-Treasurer, represented the Grand Chapter.

NORTHWESTERN UNIVERSITY

On Sunday, February 22, 1942, Alpha Chapter initiated 18 freshmen into active membership in the Fraternity. The freshmen initiated were: Jack Graffin, Chicago, Ill.; McClellan Conover, Flint, Mich.; William H. Kleinschmidt, Chicago; LaVern Swigart, Chicago; John H. Raach, Chicago; Robert V. Bourdeau, Missoula, Mont.; Harry L. Levett, Chicago; Russell J. Leonard, Houston, Texas; Jack R. Carey, Seattle, Wash.; Earl L. Barrett, Bellingham, Wash.; Neil D. Adams, Rochester, Minn.; Philip H. Heller, Lincoln, Nebr.; Wesley Walters, Chula Vista, Calif.; George Simonian, Waukegan, Ill.; Frank H. Murrin, Oak Park, Ill.; Ralph T. Lidge, Chicago; Charles R. Dickinson, Coffeyville, Kansas; Ted W. Miller, Arkansas City, Kansas.

On the following Saturday the fraternity held its annual Winter Formal at the Lakeshore Athletic Club in the Mediterranean Room. Many alumni, both from Chicago and the surrounding suburbs were present as well as members from Beta and Alpha Delta Chapters. Many of Alpha members now holding internships were able to return and the event offered a chance for reunion as well as real fun.

On Sunday, February 8, 1942, Alpha Chapter held a tea for the Twelfth General Hospital Unit which has been formed from the faculty at Northwestern University. Practically the entire staff of the hospital unit was present, as well as other Phi Rho's on the faculty. Seven Phi Rho's on the faculty will leave with the hospital and the fraternity wishes them the best of luck. The Fraternity substituted this occasion for their annual Alumni Tea.

Alumni will be glad to hear that Alpha Chapter is again getting its share of the school trophies. With the help of the freshmen the house won the team cup for ice skating. Also, the bowling team came through with a first place this year after settling for second place last year. There is hope that the chapter can win the campus trophy cup for outstanding participation in the various intramural sport events during the year.

Brother James Moore and Brace Knapp have finished the tentative draft for the new Phi Rho Song Book and are awaiting final approval for printing. They have done an excellent job with the book and it should be in the hands of all the chapters later in the spring.

Henry M. Young, who has spent the past year in instruction at Stanford University Medical School with Dr. Robert Scarborough in colon surgery and proctology, is now associated with Dr. Raymond McNealy in surgery at Northwestern University and Wesley Memorial Hospital, Chicago.

UNIVERSITY OF GEORGIA

The newly elected officers of Chi Alpha Chapter who will serve during 1942-43 are as follows: President, Fred M. Harper; Vice President, John M. Martin; Secretary, Fenwick T. Nichols; Treasurer, Clarke D. Adams; Parliamentarian, Jackson T. Giles; House Manager, W. F. Powell.

John R. McGibony has been detailed by the U. S. Public Health Service to Office of Indian Affairs, Interior Building, Washington, D. C., as Director of Health.

WASHINGTON UNIVERSITY

Alpha Delta Chapter has elected the following officers for the coming school year: President, Hugh V. Ashley, Jr.; Vice President, Carroll F. Mundy; Recording Secretary, Jack W. Cole; Corresponding Secretary, Walter W. Murfin; Treasurer, James H. Cravens; House Manager, John F. Blinn, Jr.; Senior Warden, Alfred L. Chute.

Wilkins L. Nuttall has moved from Burlington, Washington, to Longview, Washington, P. O. Box 964.

WESTERN RESERVE UNIVERSITY

On February 14, 1942, Kappa Chapter held its initiation. The following men were welcomed by the Chapter: Robert Alexander, New Philadelphia, Ohio; Robert Anton, J. A. Eicker, Paul Eiker, Harold C. Franley, Frank Houser, Thomas L. Manning, Jr., James F. Berwald of Cleveland; Patrick D. Brisini, Lilly, Pa.; Carl N. Brudzynshi and Norman W. Zaworski, Garfield Heights, Ohio; Robert E. Butler,

Oak Park, Ill.; Raymond N. Ferreri, Connersville, Ind.; Paul Glendenning, Wickliffe, Ohio; Herbert G. Johns, Euclid, Ohio; Harold E. McDonald, Findlay, Ohio; Arthur G. Michels, Moscow, Idaho; John Paul Miller, Strasburg, Ohio; Francis S. Vogel, Smyrna, Dela.

Following the initiation, a banquet was held for the entire Chapter. A well attended house dance in the evening climaxed the annual initiation activities.

Kappa Chapter is looking forward to a full summer house occupancy and activity. The next semester will start in June instead of September.

Frank W. Vincent has moved from Shelby, Michigan, to 290 Morgan Street, Oberlin, Ohio.

T. Roland McLin has an appointment at the Peter Bent Brigham Hospital, Boston, Mass.

DALHOUSIE UNIVERSITY

Alpha Eta Chapter held its annual initiation and banquet in the Lord Nelson Hotel, February 26, on which occasion the following fifteen new men were initiated into the Chapter: Robert W. M. Bethune, New Glasgow, N. S.; Douglas G. Black, O'Leary, P. E. I.; Philip A. Cole, Chester, N. S.; John B. Downing, Summerside, P. E. I.; Howard A. Locke, Liverpool, N. S.; John P. MacDonald, Sydney, N. S.; Roderick G. MacDonald, Moncton, N. B.; Donald S. MacKeigan, Halifax; Kenneth J. C. MacKinnon, Antigonish, N. S.; Walter D. Miller, Sussex, N. B.; William R. Morrison, Halifax; Donald M. Muir, Shelburne, N. S.; William I. Morse, Paradise, N. S.; Donald F. Smith, Halifax; Harry L. Stewart, Belle River, P. E. I.

At this function were twelve alumni and four honorary members. On February 29 the annual "formal" was held in the Nova Scotian Hotel. Despite a severe blizzard, forty-five couples attended the dance, and all reported a very enjoyable time.

An interesting symposium was held in the Chapter House on March 1. The topic was "Toxemias of Pregnancy" and the guest speakers were Drs. William Colwell and Kenneth Grant.

St. Valentine's Day was celebrated by a party in the fraternity house. A large number attended and a very enjoyable evening was passed.

BAYLOR UNIVERSITY

A very successful rush trip to the campus of Texas University, at Austin, was planned and executed by James Tyree, Rush Captain, on the week-end of March 7. An informal Mexican Dinner was served at THE OLD SEVIELLE. Fourteen rushees attended, eight of whom have already been accepted at Baylor. While there Brother Pelphrey obtained a complete list of the Texas boys who had applied at Baylor and we have made and remade many acquaintances from it. Accompanying Jimmie on his trip were Brothers Terry, Jewell, Harris, Lehmberg, Boswell, Reid, Halley and Wilkinson. Dr. Kelton, Councilor for Texas, had everything in readiness before our arrival.

Also, on the week-end of March 7, Brothers Lipscomb, Gaddy and Brown made a satisfactory rush trip to Denton, Texas, and visited the campus of North Texas State Teachers College.

Jack Baxter and Franklin Yeager, senior and junior representatives respectively, to the Interfraternity Council, are making a concerted effort to get a ruling passed to limit all fraternities on our campus to 24 pledges each year. This would make rushing easier.

Dr. and Mrs. Glenn Terry wish to announce the birth of their second daughter, Edna Frances Terry, on October 24, 1941. Terry is a junior. Mr. and Mrs. George Tate wish to announce the birth of their first child, George Whaley Tate, II, on August 4, 1941.

We were shocked to learn of the recent death of Homer J. Wilkins, one of our Charter members. He was found dead in his room on North Westmoreland in Beverly Hills. He is survived by his wife.

Leaving with the Baylor Unit on April 10th, were our alumni Sidney Galt, Mack Bowyer, E. L. Rippey and C. B. Carter.

The last we heard from Earl Eberly, he was gallantly fightly with General MacArthur in the Philippines.

Baylor Medical College has decided against telescoping its courses and will continue to teach medicine as always, at least for the present.

Initiation was recently held and six men were taken in. (Official investigation informs the central office that these men are an unusually splendid group and that the reason for the small number has been the extremely high standards demanded by the Chapter.)

CREIGHTON UNIVERSITY

Eta Chapter announces the initiation of the following nineteen new members on February 17, 1942: Ben C. Bishop, Livingston, Montana; Paul St. Cyr Blak, San Francisco; Joseph J. Borghoff, Omaha; Joseph R. Braitsch, Wichita, Kansas; Roy G. Brown, Onawa, Iowa; Robert E. DePersio, South Orange, N. J.; Robert W. DeVoe, Oakland, Calif.; Richard J. Fangman, Lincoln, Nebr.; Hugh F. Fitzpatrick, Omaha; Edward F. Fleming, St. Paul, Nebr.; Paul Goetowski, Fitchburg, Mass.; William J. Hopkins, Omaha; Anthony J. Krueger, Gardner, Kansas; John C. Malinowski, St. Joseph, Mo.; John H. McCullough, Wauhan, Iowa; James M. O'Neil, Council Bluffs, Iowa; Vincent Parnell, Middle Village, N. Y.; Maurice F. Perll, Frankfort, Ky.; and James W. Rouse, Omaha.

The initiation ceremonies and the banquet were held in the Chapter House. The Toastmaster for the evening was Ernest Kelley; the main speaker was Edwin C. Henry. Other Alumni present were: Doctors William Sucha, Arthur F. Gore, John Muldoon, Jack Hayes, Norman H. Atwood, and V. A. Lamphier.

William L Ross, Resident in Surgery, Firmin des Loge Hospital, St. Louis, Victor C. Myers, U. S. Public Health Department, Bureau of Industrial Hygiene, Lansing, Mich., and Avery B. Wight, U. S. Public Health Department, 1166 Lakeview, Detroit, Mich., have recently joined the ranks of the benedicts.

John F. Loosbrock is practicing at Perry, Iowa.

Joseph C. Storkan has moved from Plentywood, Mont., to 253 South St. Andrews Place, Los Angeles.

Rudolph B. Toller is Medical Superintendent of the Mendocino State Hospital, Talmage, Calif.

UNIVERSITY OF COLORADO

On February 12, 1942, Dr. Benjamin W. Black, Lambda Phi, Medical Director of the Alameda County Institutions, Oakland, California, delivered the Phi Rho Sigma lecture at the University of Colorado on "The Young Physician in the Changing World".

The Chapter pledged fourteen freshmen and recently gave them an Initiation Banquet. Colonel Wright of the Fitzsimmons General Hospital was the speaker.

The Chapter has taken up bowling and has formed three teams—the Chapter, the Sophomore Class, and the Junior Class. Thus far the Sophomore Class leads.

Oliver S. Cramer is on the staff of the Lovelace Clinic, First National Bank Building, Albuquerque, N. M.

Rudolf E. Giehm is located at 2005 East 18th Street, Denver, Colo.

Jack H. Ewalt is on the faculty of the University of Texas School of Medicine, Galveston.

MEDICAL COLLEGE OF VIRGINIA

Upsilon Chapter has opened a vigorous campaign for July pledging.

At the meeting of the American Association of Medical Colleges last fall in Richmond, more than a dozen Phi Rho deans signed Upsilon's register at the convention headquarters, and a special cocktail party at the House for them proved a most enjoyable and interesting venture.

The Chapter has been entertained this year in the homes of Doctors Dougals Chapman, Tom Murrell, James B. Dalton, James Smith, Carl Lingamfelter, and Paul D. Camp, Sigma.

The new officers for the current year are: Hiram Davis, President; Dale Groom, Vice President; Alton Wade, Secretary; and William Woodson, Treasurer.

At the present time the Chapter is composed of 15 members of excellent scholastic standard and the whole chapter is a closely knit, truly fraternal body.

UNIVERSITY OF INDIANA

The initiation banquet and dance was held March 21 at the Indianapolis Athletic Club. A precedent was established in that after-dinner speeches were abolished. In fact, neither was there a toastmaster. The president of the active chapter briefly explained the program for the evening, then introduced the newly initiated members of the fraternity, and presented Dr. Thomas V. Keene, the founder of our Chapter, and a new Indianapolis alumnus, Dr. Hugh L. C. Wilkerson, Upsilon, of the U. S. Public Health Service. Charles Green conducted a quiz program between six of the doctors and their wives. (One of the questions asked the ladies was whether they would rather have a tonsorial operation or a tonsillectomy; their husbands, who were surgeons, disagreed with them for preferring the former.) Following the quiz was a shadow play, a burlesque of an operation, which was really funny. Albert S. Ritz, the program chairman, deserved every compliment he received.

The new officers are: Alexander Shevchik, President; John Hetherington, Vice President; Jack Patterson, Secretary; Robert Vermilya, Treasurer; and Henry Paul Miller, Alumni Secretary.
